

# INFORMATION TECHNOLOGY, MS

---

The M.S. in Information Technology degree program is designed to prepare students for IT positions in any organization. Graduates will gain a comprehensive understanding of IT fundamentals that enables them to manage complex systems and articulate the value of technical solutions to non-technical decision-makers. The proposed M.S. in IT program will be composed of courses in information systems, networking, security, operating systems, systems analysis, business technology, data analytics, project management, and ethics.
